

Lecture 01: Introduction to Python

February 6, 2023

1 Introduction to Python

2 What is Python and why use it

Python is a - **high-level**, - **interpreted**, - **general-purpose** programming language that is used for a wide range of applications. - It is easy to learn, powerful, and - has a large community of users.

```
[1]: x = 1  
     y = 2  
     print (x + y)
```
